

***Gear Technology &
Applications***

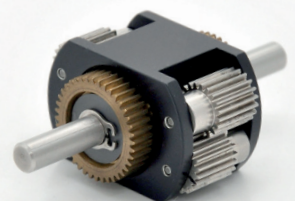

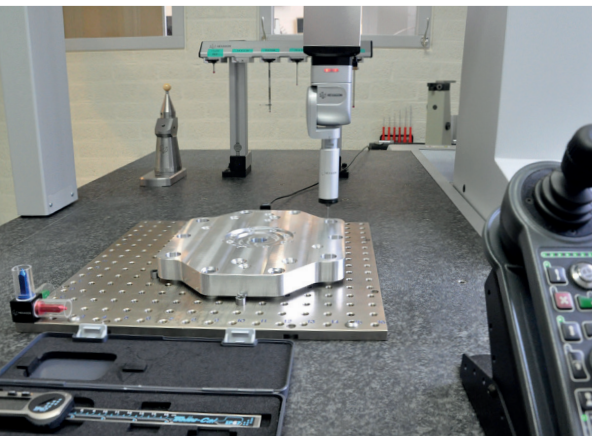

GTA is a manufacturer and supplier of toothed components and precision gears. GTA supplies mono-parts, assemblies and subassemblies. The combination of hobbing and shaping with professional turning and milling operations is what sets us apart. The added value provided by GTA is in our tailor-made advice and solutions. GTA communicates with her clients and works with them to innovate and reduce costs.

Broad expertise, openness and clear communication are important keywords for us. GTA is a transparent and progressive organization. Our team consists of over 75 people. GTA has production locations in the Netherlands and Turkey.

By working with customers and continuing to work toward the process of "lean thinking", GTA supplies quality products and assemblies at the best price. For that reason renowned companies from home and abroad return to us, even if customer demand is not completely clear yet.

Care for the environment is also an important matter to us. We are aware of the importance to build a more sustainable world. Gradually, we carry this through in our approach and method. GTA holds the ISO 9001 certificate.

Our products

- Toothed
 - Gearwheels*
 - Pulleys*
 - Gear-racks*
 - Splines*
 - Worms and worm wheels*
 - Sprockets*
 - Internal gearing*
 - Camera housings*
 - Orthopedic instruments*
 - Pump houses*
 - Machine parts*
 - Machining castings*
(aluminum and cast steel)
- Precision
- Assemblies and subassemblies

Our services

- Technical services
- Customized advice
- One-stop-shopping

The technical services we provide are:

- Toothing*
- Milling*
- Turning*
- Grinding
- Skiving*
- Complete processing*
- Injection moulding
- Surface treatments
- Hardening
- Cleanroom Packaging
- Advice in the field of teeth (including strength calculation and optimization)
- Measuring room (gear measuring machines and CMM 3D measuring machine)

*With robot and suitable for 24/7 production.

Complete processing and skiving are examples of processing methods that are very competitively priced.

Materials that we process include:

- All steel and stainless steel types
- Non-ferrous metals (incl. brass, bronze and aluminum)
- Plastics (including POM, PA, Lauramid, PEEK)
- Titanium

Customized advice

Our approach and service is based on mutual trust, flexibility and openness.

We provide advice in the areas of:

- Optimization of toothforms and gearwheels
- Cost Engineering
- Inventory Control - logistics contracts
- Purchasing
- Make or mould decision, casting, forging

We guarantee an honest and appropriate advice, tailored to customer demand and customer needs.

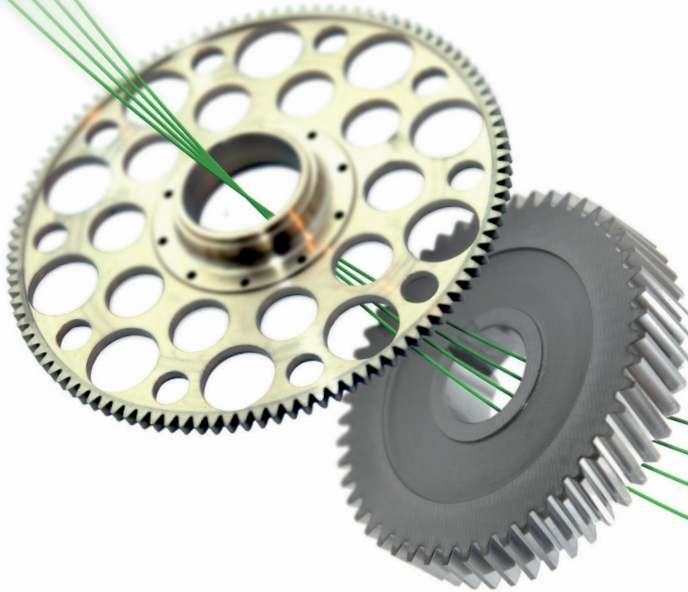

One-stop-shopping

You can purchase more at GTA. From product to customized advice, from prototype to series, from mono-parts to assemblies. GTA currently consists of production facilities in the Netherlands and Turkey.

Delivery

The high degree of flexibility makes GTA special. We supply from 1 to 15,000 pieces. Broad expertise, professional advice, consistent quality high reliability and the possibility of one-stop-shopping are strong reasons to work with GTA. GTA delivers worldwide: from Singapore to the USA, including the needed certificates. For deliveries, GTA uses custom and re-usable packaging to reduce environmental impact.

We are active in the following sectors:

Food and Dairy
Pumps and measuring equipment (gas and liquid)
Medical and Pharma
General mechanical engineering
Drives and gear units
Nautical
Packaging
Printing
Pumps
Semicon and Vision
Special Solutions

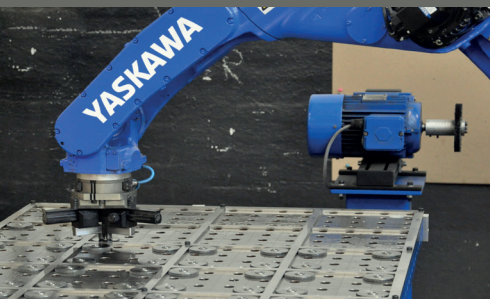

Sustainable cooperation

By working with GTA you choose a company that thinks with you. We see it as an investment. We seek a lasting workrelationship with our customers. Besides focusing on cost engineering,

make or mould decision, inventory control and custom manufacturing, we look with our expertise to your production drawings and observe the function of the product in mind. By thinking with you, through proper consultation and making time for each other, GTA is an ideal partner to focus on the entire production lifecycle.

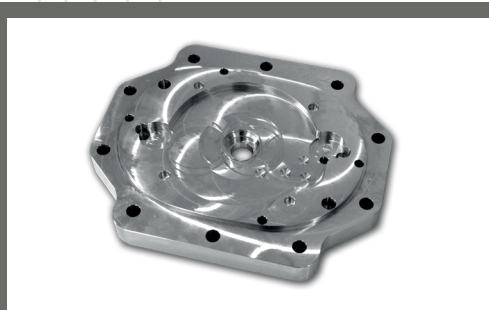

*Working with GTA
makes the difference.*

Research and development is created together with you. When this leads to structural cooperation, the resulting innovation contributes directly to strengthening Brainport Eindhoven region and a sustainable world. Make an appointment with GTA for a visit or an online consultation.

*Working with GTA
makes the difference.*

GTA Makina, our production facility in Turkey, manufactures gears and precision components and specializes in machining casting. With a team of 25 employees, GTA Makina is a modern machine workshop. Thanks to skilled staff, proven procedures, and high-quality standards, GTA Makina meets the expectations of our customers. The company is ISO 9001 certified.
